Lesson Plan

T.E. (HONOR) (Semester V)

Subject: Bitcoin and Cryptocurrency

Subject code: HBCC501

Teacher-in-charge: Prof. Monali Shetty

Academic Term: July – October 2022

Detailed Syllabus:

Sr.	Module	Detailed Content	Hours	CO
No.				Mapping
0	Prerequisite	Introduction to Cryptography: Hash functions, Public key	2	
		cryptography, Digital Signature (ECDSA).		
I.	Introduction	Structure of a Block, Block Header, Block Identifiers: Block Header	6	CO1
	to Block	Hash and Block Height, The Genesis Block, Linking Blocks in the		
	chain	Block chain, Merkle Trees and Simplified Payment Verification		
		(SPV).		
		Self-learning Topics: Block chain Demo.		

Ш	Consensus	Decentralized Consensus, Byzantine General's Problem,	12	CO2
	and Mining	Independent Verification of Transactions, Mining Nodes,		
		header Mining the Block Successfully Mining the Block		
		Validating a New Block. Assembling and Selecting Chains of Blocks.		
		Block chain Forks		
		Self-learning Topics: Study different consensus algorithms		
Ш	Introduction	What is Bit coin and the history of Bit coin, Getting the first bit	4	CO3
	to Bit coin	coin, finding the current price of bit coin and sending and receiving		
		bit coin, Bit coin Transactions.		
		Self-learning Topics: Study the website coinmarketcap.com/		
IV	Concents of	Kove and addresses Wallets and Transactions, Public Kov	12	CO4
1	concepts of	Reys and addresses, wallets and transactions: Public Rey	15	004
	Bit coin	Cryptography and Crypto currency, Private and Public Keys, Bit	15	04
	Bit coin	Cryptography and Crypto currency, Private and Public Keys, Bit coin Addresses, Base58 and Base58Check Encoding,	15	04
	Bit coin	Cryptography and Crypto currency, Private and Public Keys, Bit coin Addresses, Base58 and Base58Check Encoding, Nondeterministic (Random) Wallets, Deterministic (Seeded)	15	04
	Bit coin	Cryptography and Crypto currency, Private and Public Keys, Bit coin Addresses, Base58 and Base58Check Encoding, Nondeterministic (Random) Wallets, Deterministic (Seeded) Wallets, HD Wallets (BIP-32/BIP-44), Wallet Best Practices, Using	15	04
	Bit coin	Cryptography and Crypto currency, Private and Public Keys, Bit coin Addresses, Base58 and Base58Check Encoding, Nondeterministic (Random) Wallets, Deterministic (Seeded) Wallets, HD Wallets (BIP-32/BIP-44), Wallet Best Practices, Using a Bit coin Wallets, Transaction Outputs and Inputs, Transaction	13	04
10	Bit coin	Cryptography and Crypto currency, Private and Public Keys, Bit coin Addresses, Base58 and Base58Check Encoding, Nondeterministic (Random) Wallets, Deterministic (Seeded) Wallets, HD Wallets (BIP-32/BIP-44), Wallet Best Practices, Using a Bit coin Wallets, Transaction Outputs and Inputs, Transaction Fees, Transaction Scripts and Script Language, Turing	15	04
	Bit coin	Cryptography and Crypto currency, Private and Public Keys, Bit coin Addresses, Base58 and Base58Check Encoding, Nondeterministic (Random) Wallets, Deterministic (Seeded) Wallets, HD Wallets (BIP-32/BIP-44), Wallet Best Practices, Using a Bit coin Wallets, Transaction Outputs and Inputs, Transaction Fees, Transaction Scripts and Script Language, Turing Incompleteness, Stateless Verification, Script Construction (Lock +	13	04
	Bit coin	Cryptography and Crypto currency, Private and Public Keys, Bit coin Addresses, Base58 and Base58Check Encoding, Nondeterministic (Random) Wallets, Deterministic (Seeded) Wallets, HD Wallets (BIP-32/BIP-44), Wallet Best Practices, Using a Bit coin Wallets, Transaction Outputs and Inputs, Transaction Fees, Transaction Scripts and Script Language, Turing Incompleteness, Stateless Verification, Script Construction (Lock + Unlock), Pay-to-Public-Key-Hash (P2PKH), Bitcoin Addresses,	13	04
	Bit coin	Cryptography and Crypto currency, Private and Public Keys Cryptography and Crypto currency, Private and Public Keys, Bit coin Addresses, Base58 and Base58Check Encoding, Nondeterministic (Random) Wallets, Deterministic (Seeded) Wallets, HD Wallets (BIP-32/BIP-44), Wallet Best Practices, Using a Bit coin Wallets, Transaction Outputs and Inputs, Transaction Fees, Transaction Scripts and Script Language, Turing Incompleteness, Stateless Verification, Script Construction (Lock + Unlock), Pay-to-Public-Key-Hash (P2PKH), Bitcoin Addresses, Balances, and Other Abstractions	13	04
Ĩ	Bit coin	Cryptography and Crypto currency, Private and Public Keys Cryptography and Crypto currency, Private and Public Keys, Bit coin Addresses, Base58 and Base58Check Encoding, Nondeterministic (Random) Wallets, Deterministic (Seeded) Wallets, HD Wallets (BIP-32/BIP-44), Wallet Best Practices, Using a Bit coin Wallets, Transaction Outputs and Inputs, Transaction Fees, Transaction Scripts and Script Language, Turing Incompleteness, Stateless Verification, Script Construction (Lock + Unlock), Pay-to-Public-Key-Hash (P2PKH), Bitcoin Addresses, Balances, and Other Abstractions Self-learning Topics: Visit and use https://bitcoin.org/en/	13	04

V	Bit coin	Peer-to-Peer Network Architecture, Node Types and Roles,	7	CO5
	Networks	Incentive based Engineering The Extended Bitcoin Network,		
		Bitcoin Relay Networks, Network Discovery, Full Nodes,		
		Exchanging "Inventory", Simplified Payment Verification (SPV)		
		Nodes, Bloom Filters, SPV Nodes and Privacy, Encrypted and		
		Authenticated Connections, Transaction Pools		
		Self-learning Topics: Study technical papers based on bitcoin		
		security		
VI	Blockchain	Domain-Specific Applications: FinTech, Internet of Things,	8	CO6
	Applications	Industrial and Manufacturing, Energy, Supply chain & Logistics,		
	& case	Records & Identities, Healthcare		
	studies	Case studies related to cryptocurrencies		
		Concept of Altcoin		
		Self-learning Topics: Read Technical papers on blockchain		
		applications		

Course Objectives:

- 1. To get acquainted with the concept of Block and Blockchain
- 2. To learn the concepts of consensus and mining in Blockchain
- 3. To get familiar with the bitcoin currency and its history.
- 4. To understand and apply the concepts of keys, wallets and transactions in the Bitcoin Network.
- 5. To acquire the knowledge of Bitcoin network, nodes and their roles.
- 6. To analyze the applications and case studies of Blockchain.

Course Outcomes:

Upon completion of this course students will be able to:

CO-PO-PSO Mapping:

- HBCC50.1 : Describe the basic concept of Blockchain and its applications.
- HBCC501.2 : Associate knowledge of consensus and mining in Blockchain

HBCC501.3 : Summarize the Bitcoin crypto currency at an abstract level.

HBCC501.4 : Apply the concepts of keys, wallets and transactions in the Bitcoin Network.

HBCC501.5 : Interpret the knowledge of Bitcoin network, nodes and their roles.

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
HBCC501.1	1													1
HBCC501.2	1													
HBCC501.3	1													
HBCC501.4	1	2			1									
HBCC501.5	2													

Justification of PO to CO mapping

Course Outcome	Competency	Performance Indicator
HBCC501.1	1.3 Demonstrate competence in engineering fundamentals	1.3.1 Apply engineering fundamentals

HBCC501.2	 1.4 Demonstrate competence in specialized engineering knowledge to the program 1.3 Demonstrate competence in engineering fundamentals 	1.4.1 Apply theory and principles of Computer Science and engineering to solve an engineering problem1.3.1 Apply engineering fundamentals		
HBCC501.3 1.4 Demonstrate competence in specialized engineering knowledge to the program		1.4.1 Apply theory and principles of Computer Science and engineering to solve an engineering problem		
	2.3 Demonstrate an ability to formulate and interpret a model	2.3.1 Able to apply computer engineering principles to formulate modules of a system with required applicability and performance.		
HBCC501.4	1.3 Demonstrate competence in engineering fundamentals	1.3.1 Apply engineering fundamentals		
	2.4 Demonstrate an ability to execute a solution process and analyze results	2.4.1 Applies engineering mathematics to implement the solution		
	5.2 Demonstrate an ability to select and apply discipline-specific tools, techniques and resources	5.2.2 Demonstrate proficiency in using discipline-specific tools		
HBCC501.5	1.3 Demonstrate competence in engineering fundamentals	1.3.1 Apply engineering fundamentals		
	1.4 Demonstrate competence in specialized engineering knowledge to the program	1.4.1 Apply theory and principles of Computer Science and engineering to solve an engineering problem		

Justification of CO to PSO mapping:

HBCC501.1	2.3 Demonstrate an ability to identify tools and measures to protect the assets from cyber-	2.3.3 Choose appropriate tools and methods to protect the assets from cyber-attacks.
	attacks.	

CO Assessment Tools:

Course							
Outcomes	Unit	Unit Tests		zzes	Presentation and Blog Activity	End SemExam	Course exit survey
	1	2	1	2			
HBCC50.1	30%		10%		10%	50%	100 %
HBCC50.2		30%	10%		10%	50%	100 %
HBCC50.3	30%		10%		10%	50%	100 %
HBCC50.4		30%		10%	10%	50%	100 %
HBCC50.5		30%		10%	10%	50%	100 %

CO calculation= (0.8 *Direct method + 0.2*Indirect method)

Rubrics for assessing Course Outcome with each assessment tool:

Assignment:

Indicator						
Timeline	More than two days	Two days late (1)	One day late (2)	On time (3)		
(2)	late (0)					
Correctness	All questions	One point deducted for each incorrect answer				
(4)	correct (4)					
Completion	All questions	One point will be deducted for each incomplete or un-				
(4)	answered (4)	attempted question				

Rubrics for the Blog:

Blog post explaining your journey. The post also explain your view of how blockchain works and how it is valued. BlOG : 10 Marks

Learning Objective:

By the end of this activity, students will be able to explain what blockchain is and explain how they function on a technical and financial level.

Focused Activity

This lesson will be designed around the pedagogical strategy of Self Organized Learning Environments (SOLE), where the teacher will begin the lesson with a set of questions. Students will then be assigned to groups and be expected to design a presentation and share it with their class. In this lesson, the teacher will post questions about what is written in the blog and Blockchain/Crypto currencies. Students will be assigned to groups of 3 and will collaborate to answer the questions through online research. Each group will be assigned 1 of the 6 largest crypto currencies. After obtaining the answers they will design a presentation that will be

shared with the class. Approximately 35 minutes will be given for students to conduct their research and create the presentation. Following this time, students will then share their presentations with the class.

Presentation

Students will design a presentation on blockchain technology and share it with their peers. The presentation will feature one type of cryptocurrency or blockchain development platform.

Curriculum Gap identified: (with action plan)

Nil
